The *Portuguese Emigration Factbook 2025* was co-ordinated, compiled and prepared by Inês Vidigal from the Observatório da Emigração at CIES, Iscte, Instituto Universitário de Lisboa. The *Portuguese Emigration Factbook* is a condensed and updated version, in English, of the annual report on Portuguese emigration published by Observatório da Emigração (*Emigração Portuguesa: Relatório Estatístico*).

Please cite this publication as: Observatório da Emigração (2026), *Portuguese Emigration Factbook 2025*, Lisbon, Observatório da Emigração, CIES-IUL, ISCTE-IUL. DOI: 10.15847/CIESOEMFB2025.

First published on September 2026 by Observatório da Emigração.

The Emigration Observatory (OEm) is an independent technical and research structure within the Centre for Research and Studies in Sociology (CIES-Iscte) of Iscte, University Institute of Lisbon. The Observatory is based on a partnership between the CIES-IUL, the Institute of Sociology (IS-UP) of the University of Porto, and the Centre for Geographical Studies (CEG) and the Centre for Research in Economic and Organizational Sociology (SOCIUS/CSG), both of the University of Lisbon. The Observatory is supported by the Portuguese Ministry of Foreign Affairs under a cooperation agreement.

Acknowledgments

The authors would like to thank the Directorate-General of Consular Affairs and Portuguese Communities (DGACCP), from the Cabinet of the Secretary of State of Portuguese Communities Abroad, for all the support provided.

We wish to acknowledge the help provided by the national statistical institutes from the following countries: Austria (Statistik Austria), Brazil (Instituto Brasileiro de Geografia e Estatística, IBGE), Denmark (Denmark Statistik), France (Institut National de la Statistique et des Études Économiques, INSEE), Germany (Statistisches Bundesamt Deutschland, Destatis), Italy (Istituto Nazionale di Statistica, ISTAT), Luxembourg (Institut National de la Statistique et des Études Économiques du Grand-Duché du Luxembourg, STATEC), Mozambique (Instituto Nacional de Estatística, INE), Netherlands (Centraal Bureau voor de Statistiek, CBS), Spain (Instituto Nacional de Estadística, INE), Switzerland (Office Fédéral de la Statistique, OFS) and United Kingdom (Office for National Statistics, ONS).

We appreciate the data from the following institutions: Angolan Consulates in Portugal (Lisbon and Oporto), Federal Office for Migration and Refugees of Germany (Bundesamt für Migration und Flüchtlinge), the Department for Work and Pensions of UK, the OECD (OECD International Migration Database and DIOC), Eurostat (Database on Demography and Migration) and United Nations (International migrant stock: The 2017 revision).

Note on data

Year of reference

Factbook 2025 analyses data and estimates for 2024 or the last year available. As a rule, this data became available throughout 2025, although there are destination countries for which this availability only materialised in 2026. For this reason, the reference year for each value used is always duly noted throughout this report.

Data on outflows from Portugal (emigration flows)

Due to the right to leave the country of residence, as a rule there are no administrative records of exits (emigration) but only of entries (immigration). Estimating and characterising a country's emigration therefore requires compiling data on the entry and stay of emigrants in destination countries. The data that the Emigration Observatory collects, disseminates and analyses is therefore the data it obtains from the institutions responsible for immigration statistics in the countries where Portuguese emigration is destined. Data on inflows, often classed as 'mirror statistics' when used to measure emigration, do not correspond perfectly to data on outflows, as they also include remigration from previous destination countries. They are, however, the best proxy available for measuring emigration in flow terms.

Data on the population resident abroad (stock of emigrants)

Censuses are usually ten-yearly, in some cases five-yearly, and are the most reliable method of counting a population because they cover the whole of those living and present in a country and not a sample of them. Annual figures on the number of immigrants residing in a given country are generally either demographic estimates calculated on the basis of population movement data, or estimates obtained through sample surveys. For almost all countries, the last censuses carried out were 2000/01 and 2010/11. Thus, the figures available between 2000/01 and 2010/11, or after that date, are generally estimates. Not all countries estimate annual data on the emigrant population by country of birth, so in these cases the only reliable data available on the stock of emigrants is the latest census data.

Foreword and highlights

01. An estimated 70,000 Portuguese citizens emigrated in 2024, a value that remains broadly stable in relation to 2023. Following the sharp decline recorded in 2020, when departures fell to approximately 45,000, emigration recovered to around 65,000 in 2021 and 70,000 in 2022. Portuguese emigration therefore appears to have entered a period of relative stabilisation. This overall stability occurred despite declining inflows of Portuguese migrants in several of the main European destination countries, with trends nevertheless varying considerably across destinations.

02. The geography of Portuguese emigration remained strongly concentrated in Europe. Switzerland was once again the leading destination, registering 12,388 arrivals from Portugal in 2024, followed by Spain, with 11,332, and France, which consolidated its position as the third most important destination, with 8,088 arrivals. Germany and Belgium followed, with 7,410 and 5,471 arrivals, respectively, confirming the continuing centrality of continental Europe in recent Portuguese migration flows. Based on what is known about the composition of recent migration to these countries, Portuguese emigration is likely to have remained socially heterogeneous. It includes both workers with relatively low levels of education and occupational qualifications, who have historically predominated in flows to countries such as France and Switzerland, and highly qualified professionals, who are more strongly represented in migration to other destinations.

03. Among the principal destination countries, Germany, France and Belgium recorded increases in Portuguese immigration in 2024. By contrast, inflows declined in Switzerland, Spain, the Netherlands and Luxembourg. A particularly marked reduction was observed in the United Kingdom, which registered only 2,766 arrivals. The structural reconfiguration of Portuguese emigration initiated after Brexit therefore remains evident. The United Kingdom, which had been the leading destination before 2016, has continued to lose its former centrality, while migration flows have become more widely distributed across continental Europe, reinforcing the relative importance of countries in Central and Western Europe.

04. In terms of the accumulated migrant population, the most recent United Nations estimates indicate that approximately 1.8 million people born in Portugal were living abroad in 2024,

equivalent to around 17% of the population residing in Portugal. In proportional terms, Portugal remains one of the European Union countries most strongly affected by emigration. It ranks among the four Member States with the highest ratio of emigrants to resident population, after Romania, Croatia and Bulgaria. The difference between these figures and previously published estimates is primarily attributable to methodological revisions introduced in the latest United Nations dataset. It does not necessarily reflect a substantial change in the size of the Portuguese emigrant population, but rather adjustments to national measurement criteria and to the statistical harmonisation of data across countries.

05. Between 2023 and 2024, the overall stock of Portuguese emigrants remained broadly stable. France continued to host the largest Portugal-born population worldwide, with just under 600,000 residents in 2024. Other countries with more than 100,000 Portugal-born residents included, in descending order, Switzerland, with 204,000; the United States, with 158,000; the United Kingdom, with 156,000 in 2021; Brazil, with 138,000 in 2010; Canada, with 133,000 in 2021; and Germany, with 115,000 in 2021. In Spain, the Portugal-born population increased for the second consecutive year in 2024, consolidating the reversal of the previous downward trend and bringing the stock to approximately 96,000. In Switzerland, the number of Portuguese emigrants increased marginally, by 0.1%, following seven consecutive years of decline. This may indicate that the Portuguese population in the country is beginning to stabilise after an extended period during which new arrivals were insufficient to offset return migration and mortality among established residents.

06. From an economic perspective, remittances remain one of the principal indicators of the links between Portuguese emigrants and their country of origin. In 2024, transfers sent by Portuguese emigrants to Portugal totalled €4.295 billion, corresponding to approximately 1.5% of national GDP. Although the nominal value of these transfers remains substantial, their relative contribution to the Portuguese economy is moderate and consistent with the pattern generally observed in high-income economies. It remains far below the levels recorded in countries that are structurally dependent on remittance inflows. The geographical distribution of remittances also reflects the European concentration of Portuguese emigration. Switzerland and France remained the two principal countries of origin, accounting for 26.4% and 25.8% of total remittances, respectively. They were followed by the United Kingdom, which accounted for approximately 17%. Angola, the United States and Germany were also significant sources, each generating transfers exceeding €200 million. Overall, the ten leading countries of origin accounted for approximately 97% of total remittance inflows, eight of which were located in Europe.

Methodological remarks

01. There is a basic asymmetry in international migration. The right to leave the country in which you live is nowadays established as a basic human freedom. However, entry into a country of which you are not a national continues to depend on the sovereign will of the nation states. Consequently, there is no record of exits (emigration), only of entries (immigration). Estimating and characterising emigration from a country therefore requires gathering data on the entry and permanence of emigrants in their country of destination. The data the Observatório da Emigração gathers, reports and analyses is obtained from the institutes responsible for collecting immigration statistics in each of the countries the Portuguese emigrate to.

02. The challenge of harmonising the data produced by such a large number of organisations, the weaknesses of the statistical systems in some countries, and the international nature of the movements studied are at the origin of an increasing intervention by leading international organisations responsible for the production of databases and statistical indicators on emigration. Consulting this data is now crucial if we are to achieve a better understanding of the phenomenon of migration. The Factbook also brings together data and estimates about Portuguese emigration available from sources such as Eurostat, the OECD, the World Bank and the United Nations.

03. There is currently a consensus among international organisations on the use of place of birth as a migration indicator: an emigrant is someone who has lived for more than a year in a country different from the one in which he was born.¹ However, in terms of the statistics concerning the entry of immigrants into a country, the data generally refers to the entry of foreigners, given that controlling the entry of foreigners is the purpose of the register. As a rule, the Factbook uses both emigration indicators. When measuring and characterising the emigrant Portuguese population, the indicator used whenever possible is country of birth – people born in Portugal and living in other countries. When measuring the entry of Portuguese into their destination country, the indicator generally used is that of nationality – Portuguese citizens entering other countries.

¹ See Lemaitre (2005) and United Nations, Department of Economic and Social Affairs (1998).

04. The dispersion of data about Portuguese emigration, which is produced by statistics agencies in dozens of countries, each in their own national languages, and which are often unavailable to the public, makes it very difficult to obtain quick individual access to relevant information. The Observatório's main goal is to remove the difficulties and to compile and select original data on Portuguese emigration that is available from the sources in the destination countries, and, whenever necessary, to negotiate the collection of and access to the data produced by these sources that remains unavailable. The Observatório then harmonises and gathers the data, making it, afterwards, available through its website and in its publications. The Factbook is intended to be an annual compilation of the main indicators of Portuguese emigration resulting from this systematic endeavour, making it available in a condensed format to all those requiring this information: in particular, to researchers, decision-makers and journalists.

Glossary

Acknowledgment Adapted from European Migration Network (2014), *Asylum and Migration Glossary 3.0. A Tool for Better Comparability*, Directorate General for Home Affairs, European Commission. The EMN Glossary has been developed by the European Migration Network (EMN). The European Commission and the National Contact Points, which collectively constitute the EMN, accept no responsibility or liability whatsoever with regard to the use made of the information contained in this Glossary or of the content of the websites from which some terms are extracted. [\[LINK\]](#)

Acquisition of citizenship

Any mode of becoming a national, i.e., by birth or at any time after birth, automatic or non-automatic, based on attribution, declaration, option or application.

Notes [1] Art. 3 (d) of Regulation (EC) No. 862/2007 (Migration Statistics Regulation) refers or relates to the acquisition of citizenship to those persons having their usual residence in the territory of the Member State and having acquired during the reference year the citizenship of the Member State and having formerly held the citizenship of another Member State or a third country or having formerly been a stateless person. [2] One of the possible ways of acquiring citizenship is through naturalisation, which refers more to the decision / administrative process by the relevant authorities for the granting of nationality.

Citizenship

The particular legal bond between an individual and their state, acquired by birth or naturalisation, whether by declaration, choice, marriage or other means according to national legislation.

Notes [1] Whilst in some Member States a distinction is made between citizenship and nationality, in the EU context and for the purpose of this glossary, no distinction is made and the two terms are considered to be interchangeable. In countries which distinguish between citizenship and nationality, the term citizenship refers specifically to the legal rights and duties of nationals. The European Convention on Nationality, the International Organisation for Migration (IOM) Glossary and the EUDO Glossary on Citizenship and Nationality prefer the term “nationality”. [2] According to Art. 1 of the Hague Convention on Certain Questions Relating to the Conflict of Nationality Law, 1930, it is for each State to determine under its own laws who are its nationals. [3] The tie of nationality confers individual rights and imposes obligations that a State reserves for its population. Nationality carries with it certain consequences as regards migration, such as the right of a State to protect its nationals against violations of their individual rights committed by foreign authorities (particularly by means of diplomatic protection), the duty to accept its nationals onto its territory, and the prohibition to expel them.

Consular registration

National citizens of a given country residing abroad and registered voluntarily at a consular office of the origin country. The registration is a consular act, whereby the identification of the national citizen is inscribed in the archives of the consular office of the area of jurisdiction in which the citizen is resident or lives occasionally.

Emigrant

In the global context, a resident (national or alien) departing or exiting from one State intending to remain abroad for a period exceeding one year. In the EU context, a person who, having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State for a period that is, or is expected to be, of at least 12 months.

Note National legislation might understand different time limits in their definitions.

Emigration

In the global context, the act of departing or exiting from one State with the intention to remain abroad for a period exceeding one year. In the EU context, the action by which a person, having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State or another Member State for a period that is, or is expected to be, of at least 12 months.

Foreign population of a country

All persons who have a certain country as their country of usual residence and who are citizens of another country.

Immigrant

In the global context, a non-resident (either national or alien) arriving in a State with the intention to remain for a period exceeding a year. In the EU context, a person who establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country.

Immigration

In the global context, the act of arriving in a State with the intention to remain for a period exceeding one year. In the EU context, the action by which a person establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country.

Irregular migration

Movement of persons to a new place of residence or transit that takes place outside the regulatory norms of the sending, transit and receiving countries.

Notes [1] There is no universally accepted definition of irregular migration. From the perspective of destination countries it is entry, stay or work in a country without the necessary authorisation or documents required under immigration regulations. From the perspective of the sending country, the irregularity is, for example, seen in cases in which a person crosses an international boundary without a valid passport or travel document or does not fulfil the administrative requirements for leaving the country. There is, however, a tendency to restrict the use of the term to cases of smuggling of migrants and

trafficking in persons. [2] Defining irregular migration has been the subject of considerable debate. Terms such as illegal, undocumented, non-documented, and unauthorised migration can have different connotations in national policy debates. Due to this and the association with criminality the term “illegal migration” should be avoided, as most irregular migrants are not criminals. Being in a country without the required papers is, in most countries, not a criminal offence but an administrative infringement. [3] While the UN use the term “irregular” or “undocumented” migration, the European Commission favoured for a long time the term “illegal immigration”, but more recently refers to “irregular migration” as well. [4] The Council of Europe differentiates between illegal migration and irregular migrant. Referring to Resolution 1509 (2006) of the Council of Europe Parliamentary Assembly, “illegal” is preferred when referring to a status or process, whereas “irregular” is preferred when referring to a person.

Long-term migrant

A person who moves to a country other than that of their usual residence for a period of at least a year (12 months), so that the country of destination effectively becomes their new country of usual residence.

Migrant stock

The number of migrants in a given area on a certain date (e.g. 1 January or 31 December) of the year in question.

Migration

In the global context, movement of a person either across an international border (international migration), or within a state (internal migration) for more than one year irrespective of the causes, voluntary or involuntary, and the means, regular or irregular, used to migrate. In the EU context, the action by which a person either: (i) establishes their usual residence in the territory of a Member State for a period that is, or is expected to be, of at least 12 months, having previously been usually resident in another Member State or a third country; or (ii) having previously been usually resident in the territory of a Member State, ceases to have their usual residence in that Member State for a period that is, or is expected to be, of at least 12 months.

Notes [1] At the international level, no universally accepted definition for migration exists. [2] IOM defines migration as follows: “movement of a person or a group of persons, either across an international border (international migration), or within a state (internal migration), encompassing any kind of movement of people, whatever its length, composition and causes”. This broad definition covers all forms of migration (voluntary/forced migration, internal/international migration, long-term/short-term migration), different motives for migration (migration because of political persecution, conflicts, economic problems, environmental degradation or a combination of these reasons or migration in search of better economic conditions or conditions of survival or well-being, or other motives such as family reunification) and irrespective of the means used to migrate (legal/irregular migration). Thus it includes migration of refugees, displaced persons, economic migrants and persons moving for other purposes, including family reunification. [3] Under the UN, the definition “movements for shorter periods” would not be considered migration.

Migration flow

The number of migrants crossing a boundary, within a specific time period, for the purpose of establishing residence.

Notes [1] The boundary can range from within national borders, within the EU and international boundaries, and can range from international migration flows (crossing national borders) and internal migration flows (within the same national border). [2] UN statistics in particular also refer to “inflows” (flow of migrants entering into a particular boundary) and “outflows” (flow of migrants leaving a particular boundary).

Net migration

The difference between immigration into and emigration from a given area during the year.

Notes [1] Net migration is negative when the number of emigrants exceeds the number of immigrants. [2] Since many countries either do not have accurate figures on immigration and emigration or have no figures at all, net migration is frequently estimated as the difference between total population change and natural increase between two dates (in Eurostat’s database it is then called corrected net migration). The statistics on net migration are therefore affected by any statistical inaccuracies in any of the components used for their derivation.

Population stock

The inhabitants of a given area on a certain date (e.g. 31 December) of the year in question.

Note The population is based either on data from the most recent census, adjusted by the components of population change produced since the last census, or on population registers.

Remittances

Personal remittances. Includes personal transfers and compensation of employees. Personal transfers consist of all current transfers made or received by resident households to or from nonresident households. Compensation of employees refers to the income of border, seasonal, and other short-term workers who are employed in an economy where they are not resident and of residents employed by nonresident entities.

Short-term migrant

A person who moves to a country other than that of their usual residence for a period of at least three months but less than a year (12 months) except in cases where the movement to that country is for purposes of recreation, holiday, visits to friends or relatives, business, medical treatment or religious pilgrimage.

Stock of foreigners

The number of foreign nationals in a given area on a certain date (e.g. 1 January or 31 December) of the year in question.

Notes [1] The term is added because of the two methods used to calculate population stock. [2] Foreign stock can include migrants plus those born in a given area to foreign parents living in given area.

Temporary migration

Migration for a specific motivation and/or purpose with the intention that afterwards there will be a return to the country of origin or onward movement.

Permanent inflows

Angola The 2009 figures are not directly comparable to those available for previous years and for 2010, provided by the Consulate General of Angola in Lisbon and concerning visas granted in Lisbon, which is why they were taken from the website, where they were published. Those in 2009 include, in addition to the visas granted by Lisbon, those granted by the Angolan Consulate in Oporto and the Angolan Migration and Foreigners Service. These figures for 2009 correspond to the sum of the following types of visas: privileged (480), work (12,114), work for national reconstruction (8,843), stay aggregated to work visa (1,973) and others (study and temporary stay, 377). This calculation excludes visas which, because of their duration or purpose, do not cover situations of emigration. This includes visas for: tourism; medical treatment; courtesy; diplomats; short stay (maximum 14 days); ordinary (maximum 90 days); and transit (maximum 60 days). The 2009 figures are not directly comparable to those for 2010 onwards due to changes in the typology of visas and the inclusion of visas issued by the Angolan Migration and Foreign Service (in addition to those issued by Angolan consulates in Portugal). The figures for 2010 onward correspond to the sum of the following types of visas issued by Angola's consulates in Porto and Lisbon to Portuguese emigrants: privileged, work (the most common), work by protocol, residence and others (study and temporary stay). Information on visas issued by the Angolan consulate in Faro is unavailable. Information granted upon request. Source 2024: Consulate General of the Republic of Angola in Lisbon; Consulate General of the Republic of Angola in Porto. [\[LINK\]](#) [\[LINK\]](#)

O Observatório da Emigração é uma estrutura técnica e de investigação independente integrada no Centro de Investigação e Estudos de Sociologia (CIES-Iscte), do Iscte, Instituto Universitário de Lisboa, onde tem a sua sede. Funciona com base numa parceria entre o CIES-Iscte, o Centro de Estudos Geográficos (CEG), da Universidade de Lisboa, o Instituto de Sociologia (IS-UP), da Universidade do Porto, e o Centro de Investigação em Sociologia Económica e das Organizações (SOCIUS), da Universidade de Lisboa. Tem um protocolo de cooperação com o Ministério dos Negócios Estrangeiros.
